CARSON CITY, Nev., May 2, 2013

CARSON CITY, Nev., May 2, 2013 /PRNewswire/ -- Xumanii™ (the "Company") (OTCQB: XUII), a company that has developed proprietary technology capable of broadcasting live events in HD wirelessly from multiple cameras at events for an extremely low production cost, announces today that the Company has acquired the master license to a cutting-edge IP portfolio that will significantly enhance the Company's current platform technology. The Master License agreement allows Xumanii access to technology that can significantly enhance the bitrate at which video is uploaded and broadcast through its platform. "The rapidly expanding, multi billion dollar live stream market is highly competitive and technologically advanced so acquiring this intellectual property was key to maintaining and boosting our edge over the competition," said company President Alex Frigon. He went on to say that, "The average American family watches over 5 hours a day of video content. Currently, the online video market is a one-way push model that is grossly inefficient. We believe that we can combine streaming video and e-commerce on our platform by introducing products that accompany content. Adding to that fact is that our platform can be viewed globally so our reach can be enhanced by a huge multiplier." The XUMANII team and I look forward to announcing the upcoming lineup of talent that will be able to be viewed "live" on our platform. Please log in regularly or sign up on our website at www.xumanii.com to receive notices of upcoming live events.

Today's pick is: XUII

Hi Everyone,

XUII may have looked like it was under attack yesterday but we need our loyal subscribers to listen now more than ever...

It's no secret that the market makers have been working hard push down XUII over the last 24 hours. We've seen the stock pullback, but it's still trading well above from where we alerted.

While we're all too familiar with these market maker "tricks" following our alerts, we want our subscribers to know that we have some tricks of our own!

XUII is still the same great company that it was when our team discovered it. They have an amazing business model, a highly praised patent pending platform, and HUGE projects in the works. In fact, we bet you that you didn't know...

- Xumanii is currently negotiating with artists Kanye West, Lil Wayne, Rick Ross, 2 Chainz and records labels such as Universal Records, Def Jam records, Epic records, Columbia records, RCA records, and many more.

- Xumanii started during its testing phase with events and concert with artists such as Edward Maya, Akcent, Lil Twist, Drake after party, Elephant Man, Serani and LMFAO.

- XUII has acquired the master license to a cutting-edge IP portfolio that will significantly enhance the Company's current platform technology.

Kanye West? While the guy is a superstar the small fact he's in the news daily because of Kim Kardashian is gold!

There is too much to this great company to not keep it on your radar for the long haul!

We are asking our loyal subscribers to TRUST US and do not panic. We are sticking with XUII for the days and weeks to come because we are positive it's what's best for all of our subscribers!

Happy Trading!

Our New Pick is XUII

Hi Everyone,

XUII experienced a roller coaster day, but the liquidity was so high that it offered huge opportunities to buy low. The intra-day drop that we saw today presented a great opportunity for bargain hunters to buy shares in the low 30s. Those who did so will soon be tremendously rewarded.

Shorts have been piling up on XUII and their attempt to crush it below the 30 cents did not work out and thanks to that our members will soon be the benefactors of hundreds of percent in gains. Those of us who watched LOTE know very well that it soared from about \$1 to over \$18 as of today (and counting). It was a huge short-squeeze rally that sent the stock berserk.

XUII could soon repeat a move like LOTE. Mark our words, we believe XUII could easily go up tenfold and soar past \$3 on a short squeeze alone.

But there's more...

Here are fundamental reasons why we think XUII could skyrocket in the near term:

- 1) XUII has a platform that broadcasts live events in HD with a new, patent pending, technology that combines hardware and software wirelessly from multiple cameras at events for an extremely low production cost. The live broadcast industry is estimated to be worth over \$20B. USD and Xumanii is right in the middle of it. Details on their platform can be found here: www.xumanii.com
- 2) XUII's is partnering up with the major record labels and artists in the music industry. This year they are broadcasting live events and music concerts from a variety of major artists, establishing Xumanii as the best live broadcast platform on the market.
- 3) Xumanii is currently negotiating and have been working with artists like Kanye West, Lil Wayne, Rick Ross, 2 Chainz, Drake, LMFAO. They are also negotiating with records labels such as Universal Records, Def Jam records, Epic records, Columbia records, RCA records, and many more. Those are huge names in the music industry that could spell into mind-boggling revenues for XUII.
- 4) XUII is not just a company with a business plan and a dream. They have already launched high profile broadcasts, and seem to have every intention of launching even bigger events in the very near future. They are working on some of the most cutting edge high profile events as speak, and the next few weeks will be stunning!

Just this past New Year's Eve XUII launched a live concert on their site for singer/song writer Trey Songz that was viewed across the globe. Here's a quick teaser from Trey Songz himself that helped make this a major success:

<http://www.youtube.com/watch?v=rGmCMcgYTsw>

- 5) The live music, events and sports venue promotions industry in US has been a paragon of growth in recent years with the vast majority of industry segments, sports, arts, and music all growing at comparable rates.

We expect the market to pick up on XUII in the coming weeks making these prices a true bargain. In our opinion, shares in this company will soon trade at a multiple of it given all its recent announcements and growth potential.

If you didn't buy XUII yet as flocks of smart investors such as yourself have, now is the time. Otherwise same time, next week you will be upset wishing you had. This is our gift to you before the beginning of the summer!

Make sure to call your family, friends, colleagues, acquaintances and let them know about XUII. Now is the time.

We will be holding daily updates until XUII sees \$3 and of that we are extremely confident that it will happen!

Our New Pick is XUII

Hi Everyone,

As you know earlier today we issued our big announcement of the month. We picked **XUII** as the new company we will be featuring for the coming weeks.

It has already nearly doubled today and looks like it will be continuing a strong run up.

Our last pick tripled within 6 weeks' time. We think **XUII could easily go to \$2** before the end of next week. There was a very deep short position built in the 30 cent range which will help propel **XUII** to massive gains.

That being said the company also has a lot going on as it operates in the hot tech industry. Xumanii (**XUII**) is taking over the entertainment industry. Their first initiative is partnering with the major players in the music industry by providing the best solution on the market to smaller event producers worldwide. Xumanii is transforming and revolutionizing the live broadcast experience with its patent pending technology, online platform and solution of hardware and software.

Celebrities are deeply involved in the company and as you can imagine that is always a recipe for success. Youtube was sold to Google for almost 2 billion dollars a few years ago. It is now the most successful video website in the world.

Instagram was sold to Facebook for a billion dollars recently, and Waze is apparently in discussions with Facebook to be bought out for a billion dollars as well.

Netflix shares are close to an all-time high, and the markets in general are in the best shape they have ever been.

We think that **XUII** could get noticed very quickly by the big players such as Google and Facebook. They are in deep need of adding a new type of platform that can stream exclusive content to web users, and Xumanii addresses that need perfectly.

We will be building important coverage on **XUII** over the next few weeks so stay tuned for more information, and if you want to buy XUII now may be the time. You should have bought it this morning, but as they say "better later than never".

Everyone will be fighting to buy shares of **XUII** starting tomorrow, and if you can get them

under 50 cents there could be hundreds of percent of gains up for grabs.
